DETAILED ACTION

Allowable Subject Matter

1. Claims 1-26 are allowed.

The following is an examiner's statement of reasons for allowance: 1-26.

With respect to claim 1, the prior art of record fails to disclose or render obvious that the resource allocation criterion is selected from amongst a plurality of predetermined allocation criteria consisting of extra-cellular interference and at least one of intra-cellular interference and allocation of time resources, the selection of the criterion being made using a quantity characteristic of the propagation losses between the mobile terminal and the base station.

With respect to claim 12, the prior art of record fails to disclose or render obvious that the resource allocation criterion is selected from amongst a plurality of predetermined allocation criteria, the selection of the criterion being made using a quantity characteristic of the propagation losses between the mobile terminal and the base station; characterized in that the resources comprise transmission codes and time slots, a set of codes being associated with each slot; and characterized in that the plurality of criteria comprises an allocation criterion allocating to a new communication the transmission time slot having the lowest level of interference.

With respect to claim 15, the prior art of record fails to disclose or render obvious that the resource allocation criterion is selected from amongst a plurality of predetermined allocation criteria, the selection of the criterion being made using a quantity characteristic of the propagation losses between the mobile terminal and the base station; characterized in that the resources comprise transmission codes and time slots, a set of codes being associated with each slot; and characterized in that the plurality of criteria comprises an allocation criterion allocating to a new communication the transmission time slot having the lowest non-zero number of codes not yet allocated.

With respect to claim 18, the prior art of record fails to disclose or render obvious that the resource allocation criterion is selected from amongst a plurality of predetermined allocation criteria, the selection of the criterion being made using a quantity characteristic of the propagation losses between the mobile terminal and the base station; characterized in that the resources comprise transmission codes

and time slots, a set of codes being associated with each slot; and characterized in that the plurality of criteria comprises an allocation criterion allocating to a new communication the transmission time slot having the largest number of codes not yet allocated.

With respect to claim 20, the prior art of record fails to disclose or render obvious that comparing said value to a second value; based on the comparing selecting first and second alternative allocation criteria; when said first criterion is selected, selecting a time slot in a transmission frame based upon a level of interference; and when the second criterion is selected, selecting a time slot in a transmission based upon availability of transmission codes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a) Dent (U.S. Patent 5, 579, 306), which discloses Time And Frequency Slot Allocation System And Method.

b) Elliott (U.S. Patent 6, 438, 376 B1)), which discloses Wireless communications management and control system using mobile station position and movement information.
